Monday, October 14, 2024

Location: Bakery Voland & Indoor Minigolf

Today we take a look behind the scenes at the Voland bakery. During a tour, we will gain an insight into the craft of bakers and confectioners. Afterwards, we'll be able to try our hand at making our own plait dough. We also create our own snack...mmh! In the afternoon, we continue by train to Bassersdorf, where we try our hand at indoor mini golf at the Grindel Sports Center.

Tuesday, October 15, 2024

Location: Padelta Milandia & Tram Museum

Let's play padel today! We'll try our hand at this new sport, which is a mixture of tennis and squash. Four of us play on the court with glass walls and hit the padel ball with the padel racket over the net to the opponent's side...very easy! No previous experience is necessary and it's great fun. In the afternoon we head back to Zurich, where we explore the Tram Museum. We see original vehicles from bygone days, old ticket machines and we ride the children's streetcar "Cobralino"....YEAH!

Wednesday, October 16, 2024

Location: Zoological Museum & Flip Lab

We spend the morning at the Zoological Museum in Zurich with 1500 animal species. We become animal detectives and can discover lots of exciting things at the activity tables and research boxes. The new treasure chamber with 50 fossils will also amaze us. In the afternoon, the Flip Lab is full of action, where you can really let off steam on the various fun courses: Trampolines, air bags, basketball trampoline and ninja course!

Thursday, October 17, 2024

Location: Chocolarium & Piratolino

On a tour of the Chocolarium in the Maestrani Chocolate World of Experience, we will discover how happiness gets into chocolate. The 100-meter-long chocolate machine will amaze us, and the chocolate test is sure to give us a real feeling of happiness! Finally, we will pour and decorate our own bar of chocolate with our favorite ingredients. In the afternoon, we can really let off steam in the Piratolino play world in Winterthur.

Friday, October 18, 2024

Location: Technorama Winterthur

With its numerous exhibitions, demonstrations and 500 experiment stations, the Technorama adventure park 500 experimental stations, it offers a playful approach to knowledge and technology. We can learn interesting scientific facts with observations, levers and cranks and have the natural phenomenon of lightning explained to us during a performance. If you feel like it, you can conduct special experiments in the OpenLabs or marvel at the natural wonders of the 130-metre-long Wonder Bridge and walk through a cloud in the park. In the special exhibition "Spiegeleien", we can look forward to surprising aha-experiences with funny mirror images.
